Google Cloud

Data Lake Modernization on Google Cloud: Cloud Composer

Course Introduction

Welcome to **Cloud Composer**, where we discuss how to orchestrate data lake workflows with Cloud Composer.

Objectives

01 Create code to process data in Cloud Composer

02 Outline the foundational concepts that underpin the orchestration of workflows with Cloud Composer and Apache Airflow

03 Describe how you can debug with Cloud Composer

04 Orchestrate the movement of data from Microsoft SQL to BigQuery

At the end of this course, you will have the opportunity to complete a hands-on lab. If you are unfamiliar with the Qwiklabs lab environment, and/or the Google Cloud platform, you are welcome to view the optional demo Qwiklabs and the Google Cloud platform.
